STARTING FROM AUTUMN 2019**

Dean's Greetings

Welcome to the Faculty of Cultural Sciences, Education and Regional Development of the University of Pécs, Hungary.

As the youngest Faculty of the oldest university in Hungary – founded 650 years ago – we are committed to our main focus, that is to train future intellectuals with creative and critical thinking, who are able to respond to challenges of our era and are willing to lead positive changes in the world. Our Faculty provides courses, scientific events of high standard, innovative, hands-on practices beyond well-established theoretical knowledge in two cities, Szekszárd and Pécs. The Faculty has become a cultural, scientific, training centre, where our experts, professionals and professors foster rich tutoring and collaboration with students besides their international research, scientific and teaching practices.

The Faculty has excellent collaborations and initiatives with other faculties of the University of Pécs, several universities, research institutions in Hungary and abroad. Therefore, our future and present students have excellent opportunities to gain fruitful professional and personal experiences.

The Students of the Faculty of Cultural Sciences, Education and Regional Development, as the citizens of the University of Pécs, can partake in a prominent scientific environment provided by the first university of Hungary– the University of Pécs. Our students will be empowered by marketable and effective skills and knowledge which contribute to their personal and professional growth in order to make our world a better place.

Prof. Dr. Gábor SZÉCSI, Dean

About the Course

The Pre-school Teaching (3-7 years) BA Program in English is our brand-new course, based on the myriads of well-developed and unique expertise of our professors in training pre-school professionals in Hungary. We are proud of being acknowledged as the second best of the Hungarian teacher trainer institutes, in terms of professor proficiency. Therefore, we are dedicated to disseminating our knowledge, know-hows and innovative methods to future pre-school educators all over the world, which equip them to create positive, welcoming environment for children.

Pre-school Teaching (3-7 years) BA Program is designed for students who want to pursue a career in early years education. The program is conducted by innovative approaches and provides several practices in kindergartens from the first semester to ensure real professional experiences for our students. An extended range of optional modules and varied number of courses empower students for the challenges that can occur in pre-schools in the 21st century. The balance between traditional and alternative methods, the child-centred educational practices, that we apply, satisfy our main aim, that is, to train future pre-school teachers with high expertise of both theoretical and practical knowledge that are essential for the profession.

Our courses provide theoretical and practical expertise to a great extent, such as, psychology, pedagogy, children's literature, music education, structural thinking development with games, environmental education, P.E., intercultural education, ESP among many others. We hope to welcome you in our team soon!
